# Answer: 01

```php
<?php
    $a=$_POST['n1'];
    $b=$_POST['n2'];
    echo "Summation of Two Numbers: ".$a+$b;
?>
```

# Answer: 02

```php
<form action="subtract.php" method="GET">
    <input type="text" name="a">
    <input type="text" name="b">
    <input type="submit" name="bt">
</form>

<?php
    if(isset($_GET['bt'])){
       $x=$_GET['a'];
       $y=$_GET['b'];
       $s=$x+$b;
       echo "Sub of two numbers".$s;
    }
?>
```

# Answer: 03

```php
<form action="" method="GET">
    <input type="text" name="ary[]">
    .....
    <input type="text" name="ary[]">
    <input type="submit" name="bt">
</form>
<?php
if(isset($_GET['bt'])){
    $d=1;
    $AR=$_GET['ary'];
    for($i=0;$i<=10;$i++){
       $d*=$i;
    }
    echo "Result".$d;
}
?>
```

# Answer: 04

```php
<?php
    $db=mysqli_connect("localhost","root","","db_info");
    if($_POST['button']=="Submit"){
      $id=$_POST['ID'];
      $nm=$_POST['Name'];
      $adrs=$_POST['Adrs'];
      $sql="INSERT INTO tbl_students
      VALUES('$id','$nm','$adrs')";
      $qry=mysqli_query($db,$sql);
      if($qry){
          echo "OK";
      }else{
          echo "Not OK";
      }
    }
?>
```

# Answer: 05

8
14

**23**
**35**
**50**
**68**
**Final Result:68**

# Answer: 06

**String Length: 15**
**TripletODD**

# Answer: 07

**Summation: 45**
**March is the third Month**
**June is the sixth Month**
**September is the ninth Month**
**December is the twelfth Month**

# Answer: 08

Try Yourself

# Answer: 09

```php
<?php
    $a=$_GET['a'];
    $b=$_GET['b'];
?>
<table border="1">
    <tr>
       <th>Value One</th>
       <th>Value Two</th>
    </tr>
    <tr>
       <td><?php echo $a; ?></td>
       <td><?php echo $b; ?></td>
    </tr>
</table>
```

# Answer: 10

**At the end of the loop a = 50 and b = 25**
**35**
**37**
**43**
